

WILLIAM WESTWOOD

London - [LinkedIn](#) - williamwestwood.com - hello@williamwestwood.com

PROFESSIONAL SUMMARY

Creative technologist working across software engineering and design. I build native apps, tools, and installations. With as much care for how a system feels as how it performs. My background spans UAL and Somerset House, moving fluidly between production code and physical, interactive work.

Graphic communication design meets full-stack development: I sit at the point where design thinking becomes shipped software.

WORK

Lead Software Engineer (2025 - Current)

Ambient Works, London (Hybrid)

- Leading development and release of an IoT companion app, from architecture through to shipped product
- Building internal and customer-facing tools that make complex hardware feel simple

Technical Consultant (2024 - 2026, ongoing project basis)

Independent - Louis Morlaë, Bold Tendencies & Tranen

- Delivered technical consultancy across three exhibitions for the same artist, spanning interactive software, robotics, and sculptural engineering
- Built a web scraper and sentiment analysis pipeline to drive the political positioning of three robot sculptures on a grid, based on scraped personality data
- Engineered a solar panel and wind sensor into a mobile rover-like sculpture, wiring live environmental data into music mixing software
- Developed an interactive narrative chatbot with custom frontend for a Somerset House exhibition

Design Engineer (2024 - 2025)

University of the Arts, London

- Led development of an AI-powered search engine using LLMs and embedding models
- Built and maintained web applications supporting creative programs across the university
- Worked with faculty to bring technical solutions directly into how students learn

Visiting Practitioner (2023 - 2025)

Creative Computing Institute, London

- Mentored students in programming and creative computing, one-to-one and in groups
- Supported debugging and problem-solving in practical sessions
- Guided the technical delivery of student creative-technology projects

EDUCATION

BA Graphic Communication Design (2024)

University of the Arts, London

Diploma, Creative Computing (2023)

Creative Computing Institute, UAL, London

Foundation Diploma in Art & Design (2019)

Abingdon & Whitney College, UAL Awarding Body

TECHNICAL SKILLS

Creative Technology: Machine Learning, LLMs, Python, C++, Linux
Development: HTML, CSS, JavaScript, React, React-Native, Expo, Node.js, Flask
Design Tools: Adobe Creative Suite, Figma, Blender, Fusion (CAD)
Methodologies: WCAG, Agile Development, User-Centric Design, Git Workflow
